

H&B

Elevators

elevating the standard

# About H&B

H&B Elevators is an industry leader in the production of standard and custom cabs, entrances and doors for the large elevator contractors as well as the many independent elevator contractors. We proudly produce these quality products for both new construction and modernizations:

- UL Labeled Entrances & Doors
- Cab Shells & Complete Cabs
- Interiors
- High-end Custom Cabs & Entrances

H&B Elevators is a certified Minority Business Enterprise (MBE)

## Organizational Affiliations:

“

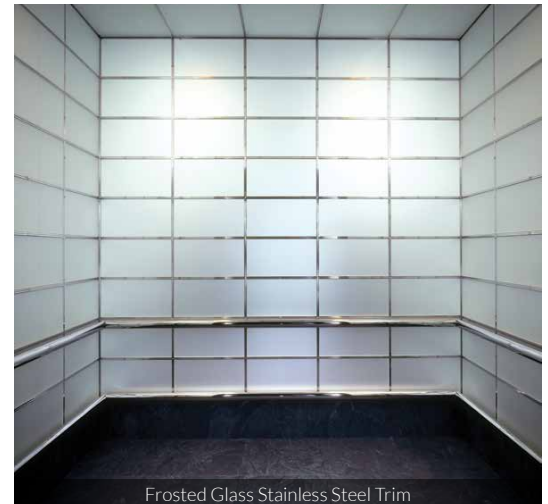

We would be pleased to have you list us as a reference for H&B Elevators for the elevator cabs that were constructed for 71 South Wacker Hyatt in Chicago.

John L. Sullivan, Associate Partner  
Pei Cobb Freed & Partners Architects LLP, NY

# Cabs

H&B cabs are built to fit the end-customer's imagination. Over the last 70+ years, H&B has built cabs for buildings around the world and none are designed or built the same. Our specialty is using specially specified materials in cabs to individualize the look and feel while keeping the cost and weights to a minimum.

## Special Materials Include But Are Not Limited To:

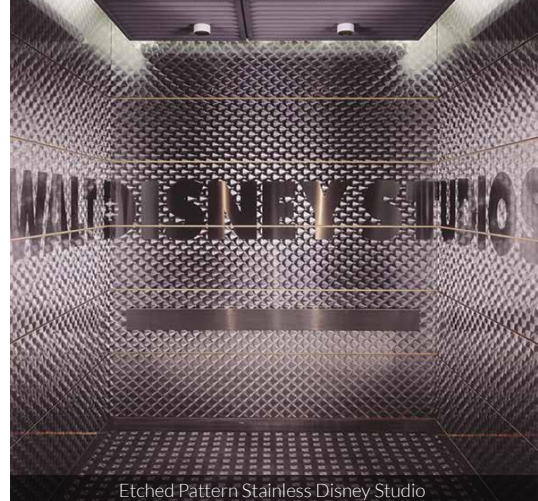

- Glass
- Wood
- Stone/Marble
- Specialty Lighting
- Plastic Laminate
- Veneer
- Specialty Finished Metals

“

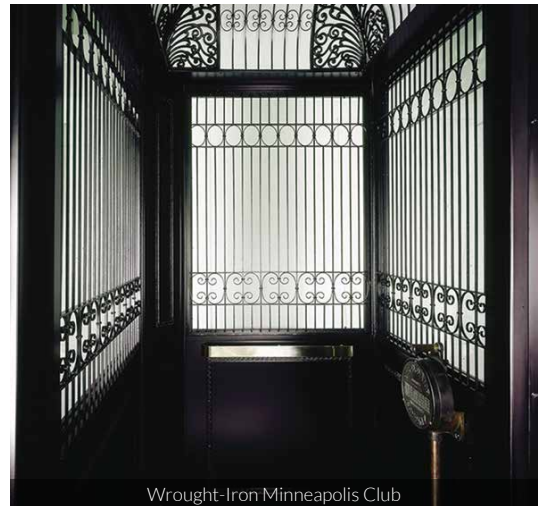

The new elevators in the West Building look absolutely awesome and are holding up exceptionally well in our environment. You really listened when we visited your plant to discuss the aesthetic details, quality and durability that we wanted and needed here at the Convention Center. Our customers and guests come from all over the world and you were able to provide us with some of the finest elevator cabs I have seen down to the most durable cabs built for our back of house areas.

John J. Romano, Director, Building Operation,  
McCormick Place, Chicago, Illinois

## Today

H&B is the premier manufacturer of custom passenger elevator cabs and entrances in the world.

## 1970's

When the high-rise construction market started booming in the early 1970's, H&B opened an elevator manufacturing plant in Odessa, Texas. When the building boom slowed dramatically, the Texas plant was closed.

## 1945

H&B entered the custom passenger elevator entrance business with an expanded facility in Minneapolis, Minnesota.

## 1930's

During the Great Depression, the company focused on helping public facilities (schools, courthouses) to make improvements. Hauenstein & Burmeister became one of the first distributors and installers of acoustical ceilings to reduce noise in schools, churches and public buildings.

## 2013

After years of working at the company in various capacities, Jashan Eison partnered with Fred Pofert to purchase H&B Elevators. The company continues to operate in Minneapolis, Minnesota.

## 1958

H&B entered the custom passenger elevator cab business.

## 1940's

During World War II, H&B expanded its capabilities by manufacturing wooden ammunition boxes and by purchasing a metal fabrication shop to manufacture airplane hangar doors. As an extension to its business model, the company began manufacturing elevator entrances along with hollow metal and other metal specialties.

## 1920's

George Hauenstein of New Ulm, Minnesota sold weather-stripping for wood storm windows throughout seven cold-weather states in the Upper Midwest. A close personal friend, Otto Burmeister, held the patent for double hung aluminum storm windows. Together they formed Hauenstein & Burmeister (H&B) in Minneapolis, Minnesota.

## H&B Elevators: An Entrepreneurial Spirit

Committed to product integrity, personal and professional service and customer satisfaction.

## Our Mission

To be the most responsive and customer-focused company within the global elevator market admired for its employees' diligent attention to detail on the full spectrum of aesthetic elevator designs.
